## IT ALL STARTS WITH A GOAL

From making varsity to making the game-winning shot on the biggest stage, all athletes have dreams. Our aspirations are what drive us. Athletes who stop at nothing deserve Goalrilla, the training equipment that truly replicates the in-game experience. So when it's all on the line, athletes have extreme confidence in their ability to deliver. That's what Goalrilla brings to training and that's how dreams become a reality. **Welcome to Goalrilla.**

# DREAM BIGGER THAN YOUR DRIVEWAY

**This is where it starts.** On this concrete rectangle. Impossible three pointers are drained. Neighborhood reputations are made. But for some of us, that's only the beginning. We're shooting for more. More court time. Varsity. A ride to a D1 school. And Goalrilla is the basketball hoop that's gonna take us there. This is where it starts. But there's no telling where it ends.

# DIRECT CONNECT TECHNOLOGY

INSTITUTIONAL TOUGH – DESIGNED FOR YOUR DRIVEWAY

Most adjustable basketball goals pivot where the rim and backboard meet the backboard arms. This causes forces on the rim to be directly transferred to the backboard frame and glass.

The Goalrilla DC eliminates this pivot point, and instead transfers all forces to a solid cage supported by double-welded crossbeams via a 4" steel beam.

This technology allows the Goalrilla DC72E1 to support **UP TO 2,000 LBS. (1 TON)**

Watch the video at [goalrilla.com](http://goalrilla.com) ▶

The **DC72E1** features **DUAL WELDED TORSION BARS** on its lower board arms to prevent backboard sway.

**GOALRILLA DC72E1 INCLUDES:**

- +  NCAA REGULATION BACKBOARD PAD
- +  PREMIUM POLE PAD

# CLEAR VIEW WITH STBLZR™ TECHNOLOGY

REVOLUTIONARY TECHNOLOGY THAT SIGNIFICANTLY REDUCES THE SHAKE OF A BASKETBALL GOAL

**STBLZR TECHNOLOGY FEATURES** a Tuned Mass Damper, a small resonant system added to the top of the goal that reduces the amplitude of vibration by absorbing kinetic energy. The **STBLZR** design uses an internal, moving mass that **ABSORBS THE MOTION OF THE GOAL** and is quickly brought to a rest using a magnetic field.
